Specialization

Hasan Gurel

Java Backend Developer | Spring Boot • Microservices • REST API |
2+ Years Experience
Ankara, Türkiye

Summary

Experienced Java Backend Developer with 2+ years building scalable, high-performance applications using Spring Boot and microservices architecture.

Core Expertise:

- Microservices design and implementation with Spring Boot
- RESTful & SOAP API development and integration
- Authentication systems (JWT, OAuth2, LDAP, RBAC)
- Database optimization with Hibernate/JPA (PostgreSQL, MySQL, NoSQL)
- Containerization and orchestration (Docker, Kubernetes)
- Performance optimization and distributed caching (Redis)

Proven track record developing enterprise-grade financial and educational platforms with focus on security, scalability, and clean architecture. Passionate about building robust backend systems that solve real-world problems.

IBM Certified Java Developer Professional | Computer Engineering Graduate, Eskişehir Technical University

Experience

workeb

Java Software Engineer

August 2024 - Present (1 year 6 months)

Developed and maintained microservices architecture using Spring Boot with focus on scalability and performance

Implemented JWT and OAuth2 authentication systems with role-based access control (RBAC)

Designed and built RESTful APIs with rate limiting strategies, improving system reliability by 40%

Optimized database queries using Hibernate ORM, reducing response times by 35%

Integrated Redis for distributed caching to enhance application performance

Leveraged Docker and Kubernetes for containerization and deployment automation

Tech Stack: Java 17, Spring Boot, Hibernate, PostgreSQL, Redis, Docker, Kubernetes, Maven, Git

VOGUE TELECOM FZCO

Back End Developer Intern

July 2023 - August 2023 (2 months)

Dubai Emiriği, Birleşik Arap Emirlikleri

- Developed and maintained back-end components for financial applications using Java Spring Boot.
- Implemented Docker and Kubernetes for containerization and orchestration, enhancing deployment efficiency.
- Designed and integrated REST and SOAP APIs, ensuring secure and reliable payment processing.
- Employed event-driven design patterns to improve application responsiveness and scalability.

Konya Bilim Merkezi

Software Engineer Intern

September 2021 - January 2023 (1 year 5 months)

Konya, Turkey

- Developed expertise in distributed caching systems, particularly Redis, to enhance application performance.
- Designed and implemented robust distributed systems using Spring Boot for backend development.
- Collaborated with a dynamic team at Konya Bilim Merkezi, contributing to innovative software solutions.

EESTEC - Electrical Engineering STudents' European assoCiation

Web Development Intern

January 2020 - May 2020 (5 months)

- Collaborated with an international team as a Web Development Intern at EESTEC, focusing on WordPress projects.
- Engaged in problem-solving activities to enhance web functionalities and user experience.

- Actively participated in EESTEC club initiatives, fostering teamwork and knowledge sharing among members.

Education

Eskişehir Technical University

Bachelor's degree, Computer Engineering · (September 2019 - June 2024)
